安装步骤

INSTALLATION

为使安装顺利，客户自备G1/2"外螺纹接管(1)，两端螺纹上缠绕足以密封的密封胶带或涂合适的密封胶。安装G1/2"接管，接管露出墙外的长度应为9~13mm。安装连接件(2)，调整位置使螺纹出口(3)朝向正下方。

打开水源，冲水约为一分钟以清除杂质。

To perform installation, installer must provide G1/2" nipple(1) to the pipe so it extends 9~13mm beyond the finished wall. Apply tape or thread sealant to the nipple threads. And install the connector kit(2). Adjust the position and make sure the thread outlet(3) faces down.

Flush both water supplies through the supply elbow for about one minute to remove debris.

清洗说明

适用于所有加工处理过的表面：以中性肥皂水清洗镀层表面，再以干净的软布彻底擦干整个表面，许多清洁剂，比如氨水、去污粉及洁厕灵等，会对电镀表面造成伤害，切忌使用。

有磨损性的清洁用具或清洁剂也不可使用时科勒牌的水龙头及其配件上。

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
