

74046X Bath Spout

BEFORE YOU BEGIN

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.

Please leave these instructions with the customer. They contain important information.

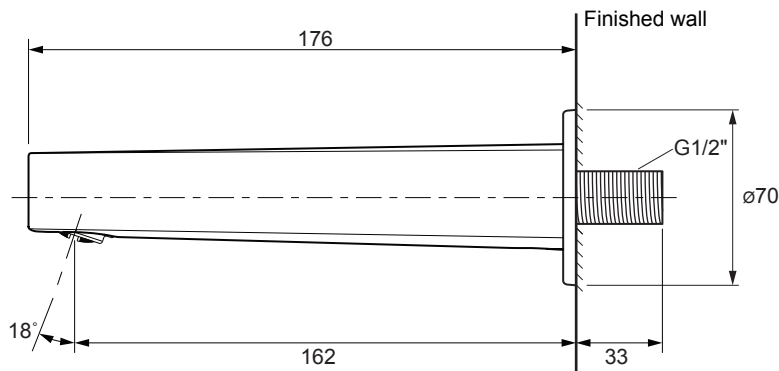

NOTE:

1. Flush the water supply pipes thoroughly to remove debris.
2. Shut off the water supply to the fitting.
3. Observe local plumbing codes.

ROUGH-IN DIMENSIONS

Dimensions are approximate.

Unit: mm

Note: The recommended dimension for installation can be adjusted according to user preferences and layout.

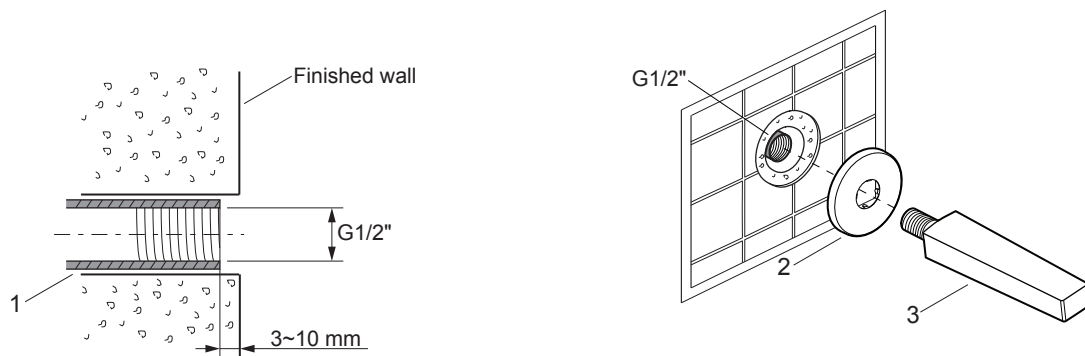

INSTALLATION

To perform installation, installer must provide G1/2" female supply fitting(1), keep proper position in the wall.

Slide the escutcheon (2) onto the spout assembly (3). Cut the extra length of threaded part if required so that the escutcheon flushes with the finished wall when tightened with the G1/2" female elbow

Apply tape or thread sealant to G1/2" threads of the spout assembly.

Tighten the spout to the G1/2" female supply fitting. Make sure the spout faces downwards.

INSTALLATION CHECKOUT

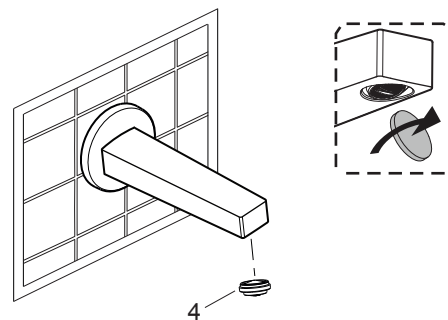

Ensure that all connections are tightened.

Open the bath drain. Remove the aerator (4).

Turn on the main water supply flushing water through the spout for one minute to remove any debris.

Turn off water supply.

Tighten the aerator. Ensure there is no leakage from the sides of aerator after tightening.

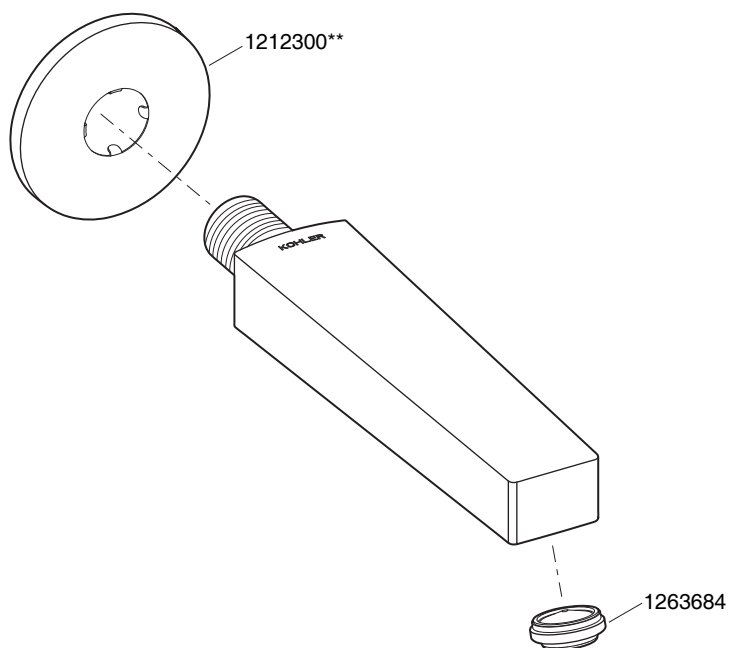

CARE AND CLEANING

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.

SERVICE PARTS
