BEFORE YOU BEGIN

All information is based on the latest product information available at the time of publication. Kohler Co. reserves the right to make changes in product characteristics, packaging, or availability at any time without notice.

Please leave these instructions for the consumer. They contain important information.

NOTES:

1. Flush the water supply pipes thoroughly to remove debris.
2. If possible, install this faucet before installing the lavatory.
3. Inspect the supply tubing for damage and leakage. Replace and maintain as necessary.
4. Observe local plumbing codes.
5. Shut off the water supplies to the fitting.

ROUGH-IN DIMENSIONS

77969K

INSTALLATION

How to Install the Spout Only for 77967K/77969K

Slide the escutcheon(1) into the bottom of the spout(2). Insert the spout kit into the mounting hole of the lavatory with escutcheon.

From underside of the lavatory, place the washer(3), steel washer(4) and fixing ring(5) onto the shank(6). Position the faucet. Screw the fixing ring. Tighten the screws(7) to secure the spout.

Install the supply tee(8) to the shank and tighten by the hook(9). Connect the hoses(10) and tee supply. The other end of the hoses should be connected to the side bodies.

How to Install the Spout Only for 77968K

Put the washer(11) into the groove of the escutcheon(12). Insert the spout kit(13) into the mounting hole of the lavatory with washer.

From underside of the lavatory, place the washer(14), steel washer(15) and fixing ring(16) onto the shank(17). Position the faucet. Screw the fixing ring. Tighten the screws(18) to secure the spout.

Put the plastic washer(19), rubber gasket (20) into the supply tee(21). Thread supply tee to the shank.

Connect the hoses(22) and supply tee. The other end of the hoses should be connected to the side bodies.

How to Install the Drain

Remove the stopper(23) from the top waste(25). Install the top waste with the foam washer(26) into the drain hole. Put the rubber washer(27, tapered side up) into the groove of the bottom waste (28). Align the top waste(25) with the bottom waste(28), screw the stud(24) through the hole of the top waste and bottom waste with hexagon wrench. Then screw the stopper into the top waste.

NOTE: If needed, apply a ring of plumbers putty around the underside of the top waste, instead of using foam washer.

INSTALLATION CHECKOUT

Ensure that all coupling nuts are tight. Ensure that the handles are in the off position.

Turn on the main water supply and drain, and check for leaks. Repair as needed.

For 77967K and 77969K, remove the aerator(29) by key(30). For 77968K, remove the aerator(31) by key(32). Run hot and cold water through faucet for about one minute to remove any debris. Check for leaks. Repair as needed. Remove any debris from the aerator. Shut off the faucet. Reinstall the aerator.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc, which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
