

Record your model number: _____

⚠ WARNING: Risk of scalding. High water temperature can cause severe burns. Set the valve water temperature at or below 120°F (49°C). Refer to the temperature adjustment instructions for the valve.

⚠ CAUTION: Risk of property damage. Spraying pressurized water directly at the sprayface may cause water to leak behind the finished wall. Do not spray pressurized water directly into the sprayface.

⚠ CAUTION: Risk of product damage. Only tighten or loosen the body spray using the brass flange underneath the escutcheon.

NOTICE: Retain the body spray wrench after use. This wrench is needed to remove the body spray for cleaning or servicing.

NOTE: The steps are the same for single and multiple body spray installations.

Follow all local plumbing and building codes.

1A. Socket Wrench

1B. Temporary G1/2 Nipple and Plug

1C. Sealant Tape

2A. Installation Depth: 2-7/16" (62 mm) - 2-3/4" (70 mm)

3A. Single Body Spray: Install a G1/2 elbow and temporary nipple at the body spray installation location.

3B. Multiple Body Sprays: Construct a pressure-balancing loop. Install a G1/2 tee/elbow and temporary nipple at each body spray location.

4A. Flush hot and cold water for 1 minute to remove any debris.

6A. Turn ON the water supplies and check for leaks.

8A. Using a hacksaw, cut the plastic guard to be flush with the finished wall material when installed.

9A. Install the finished wall. Remove the temporary nipple.

10A. 11 mm Hex Bit

11A. If the supply pressure is more than 0.3 MPa (3 bar), install the provided flow regulator into the adapter.

12A. 11 mm Hex Bit

13A. Turn the escutcheon counterclockwise to disengage the brass flange.

15A. Periodically rub debris from the nozzles while water is running.

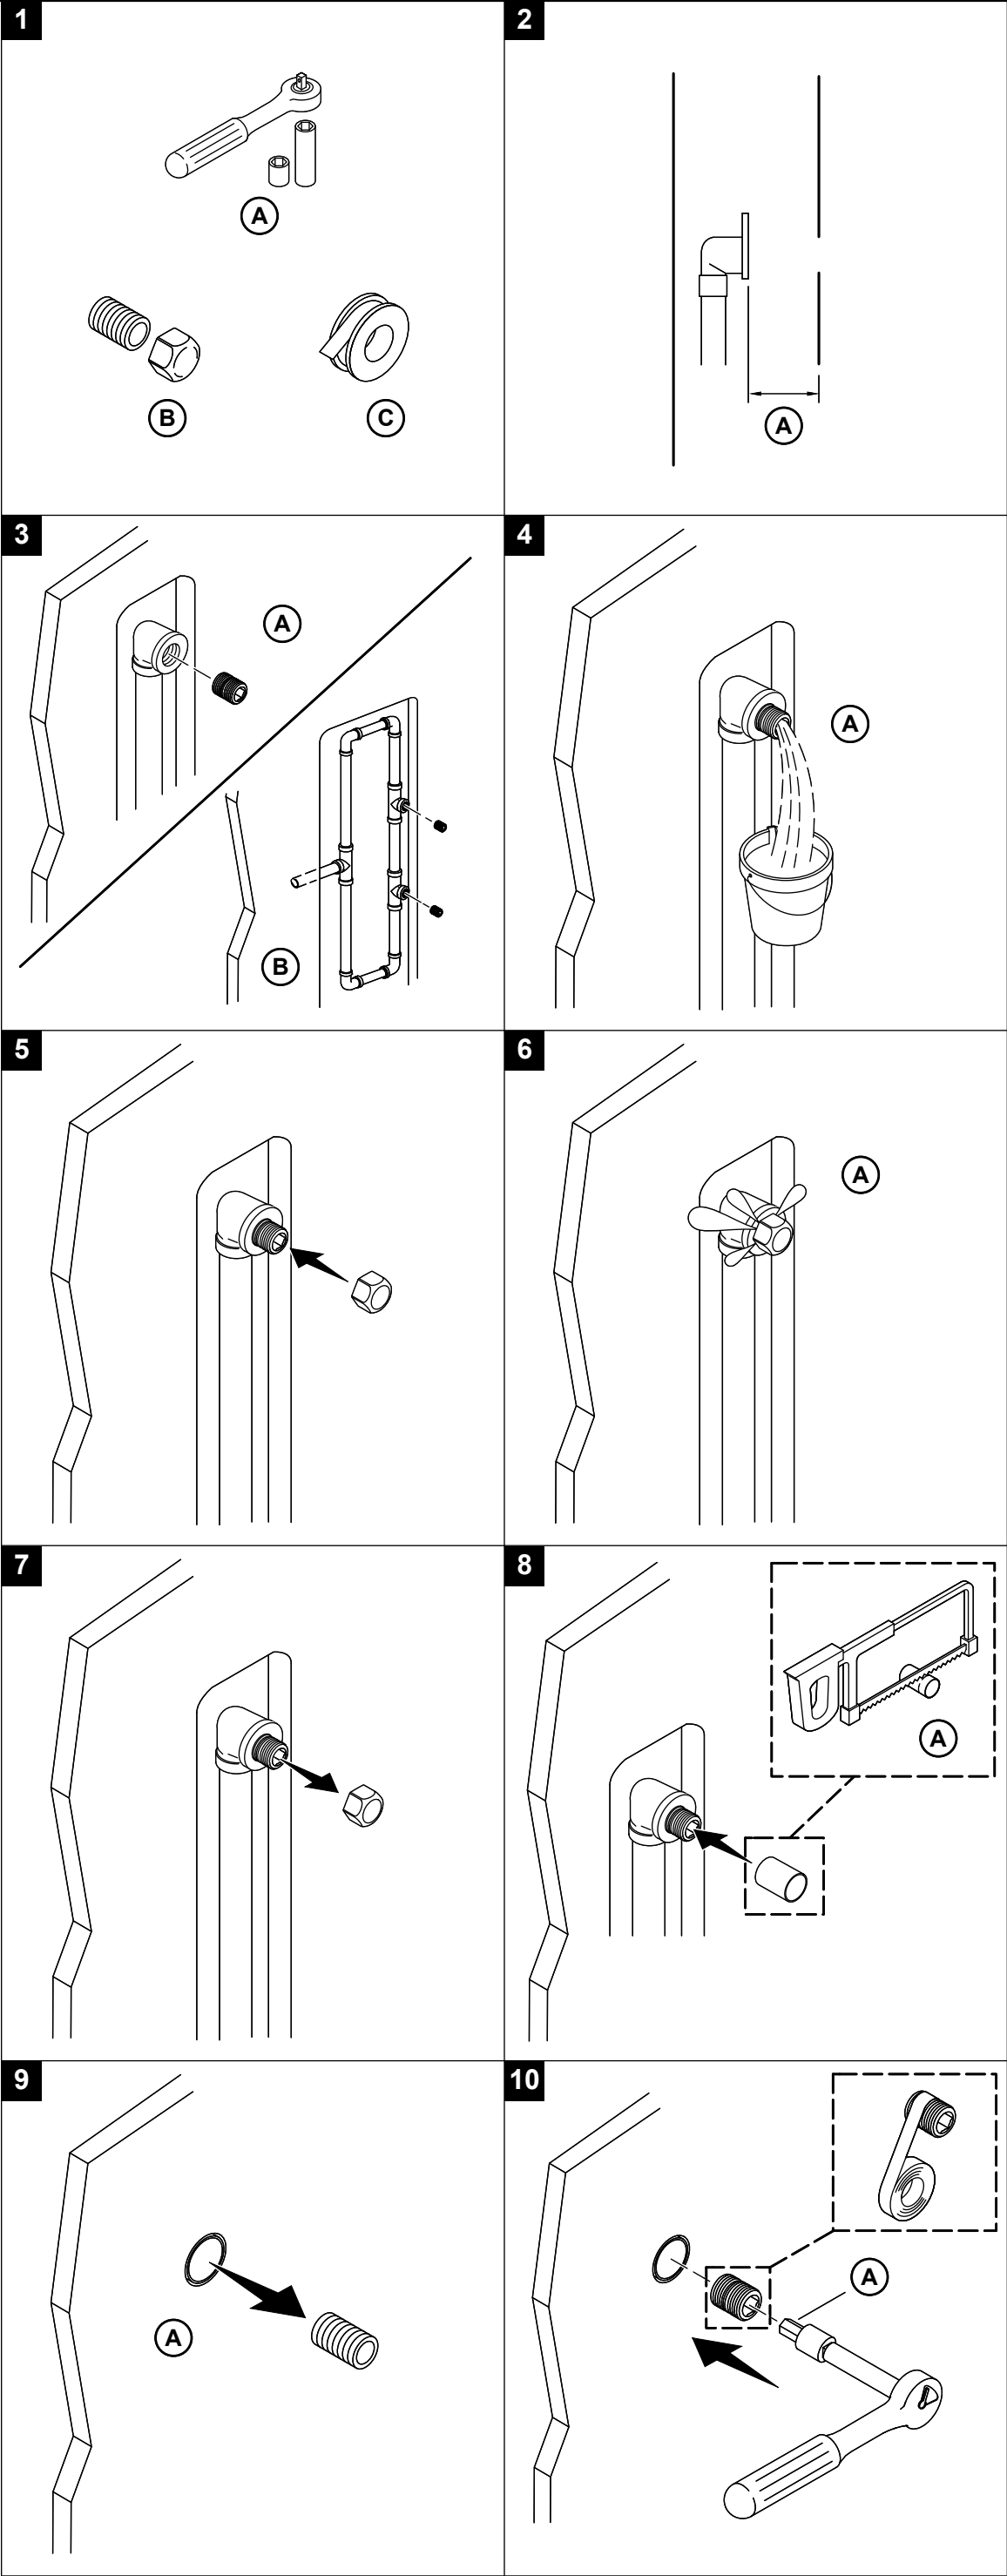

16A. Periodically rinse debris from the screen washer.
