LIMITATIONS: 1) Environmental declarations from different programs (ISO 14025) may not be comparable; 2) Comparison of the environmental performance using EPD information shall be based on the product's use and impacts at the building level, and therefore EPDs may not be used for comparability purposes when not considering the building use phase as instructed under this PCR; 3) Full conformance with the PCR allows EPD comparability when all stages of a life cycle have been considered, when they comply with all referenced standards, use the same sub-category PCR, and use equivalent scenarios with respect to construction work. However, variations and deviations are possible. example of variations: Different LCA software and background LCI datasets may lead to differences results for upstream or downstream of the life cycle stages declared.

This document is an environmental product declaration (EPD) in accordance with ISO 21930. EPDs rely on Life Cycle Assessment (LCA) to provide information on a number of environmental impacts of products over their life cycles.

Environmental product declarations enable purchasers and users to compare the potential environmental performance of products on a life cycle basis. They are designed to present information transparently to make the limitations of comparability more understandable. TRs/EPDs of products that conform to the same PCR and include the same life cycle stages, but are made by different manufacturers, may not sufficiently align to support direct comparisons. They therefore cannot be used as comparative assertions unless the conditions as defined in ISO 14025 Section 6.7.2. 'Requirements for Comparability' are satisfied.

At Kohler Co., we believe in protecting the environment and enhancing the quality of life for current and future generations. When developing new products, we consider the environmental impact at each stage of a product's existence - from the activities of our suppliers through the end of the product's useful life. Designing for a better world means every choice counts.

20-1/2" rectangular undermount bathroom sink

Product Description

KOHLER® Caxton has a simple, streamlined design that's as versatile as it is attractive. This rectangular undermount bathroom sink's easy-to-clean sink combines the sleek look of an integrated basin with a timeless design that suits both traditional and modern bathroom decors. Caxton creates a sleek transition from the smooth rectangular basin to just about any countertop.

Additional data can be found at:

<https://www.kohler.com/en/products/bathroom-sinks/shop-bathroom-sinks/caxton-rectangle-undermount-bathroom-sink-with-overflow-and-clamp-assembly-20000>

Product Features

- Rectangular basin
- Overflow drain
- No faucet holes; requires wall- or counter-mount faucet

Product Standards, Approvals and Certifications

Specified model meets or exceeds the following:

- ASME A112.19.2/CSA B45.1
- ADA
- ICC/ANSI A117.1

Manufacturing Process Description

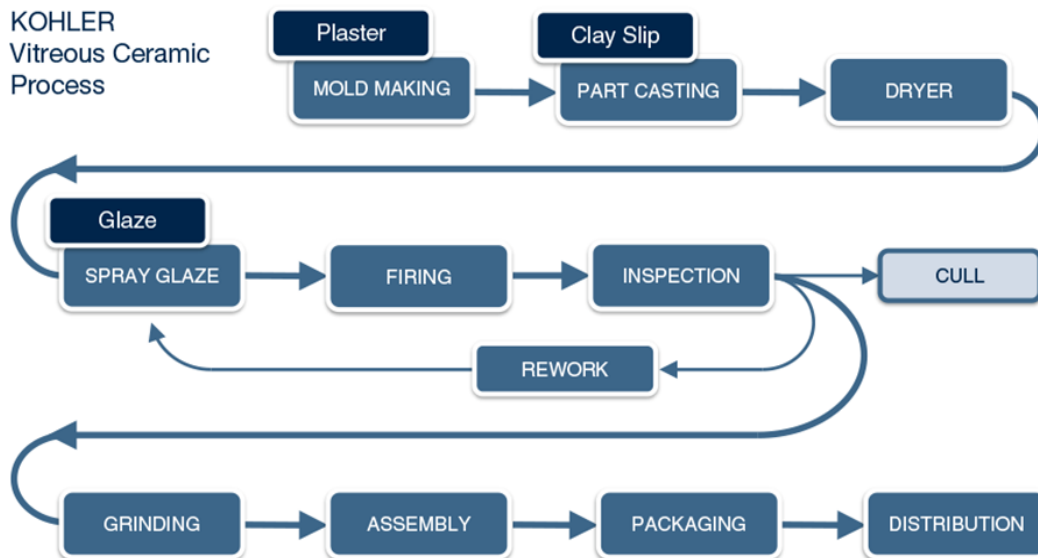

The body of vitreous ceramic sanitary ware is manufactured by casting slip - a mixture of water, clay, feldspar and silica - into a reusable mold. The cast body is partially dried, sprayed with an aqueous glaze mixture, and fired in a kiln to vitrify the product. An inspection process follows that ensures a singular high level of product quality. Finally, the ware is fitted with non-vitreous components, packaged and shipped.

Manufacturing Locations

Not all products are produced in all plants. EPDs for specific models only include data from plants in which they are produced.

Health, Safety and Environmental Aspects during Production

Kohler Co. has established program management guidelines for safety, accident prevention and environmental performance. These systems enable Kohler Co. operations to achieve world-class performance: Kohler Safety Management System (KSMS) and Kohler Environmental Management System (KEMS). The management systems are based on best management practices, and the application of these programs consistently delivers significant results.

Packaging

Vitreous ware is packaged primarily with double-wall corrugated containerboard. When utilized, white exterior wrapping is manufactured with an Elemental Chlorine Free (ECF)/Totally Chlorine Free (TCF) bleaching process. Other packaging materials can include expanded polystyrene (EPS), low density polyethylene bags (LDPE) and honeycomb paperboard blocking. Corrugated containerboard and honeycomb blocking are 100% recyclable, and collection is available in most municipalities. Other materials are typically recyclable; however, this is dependent on local availability of collection programs.

Installation A5

<https://www.kohler.com/en/products/bathroom-sinks/shop-bathroom-sinks/caxton-rectangle-undermount-bathroom-sink-with-overflow-and-clamp-assembly-20000>

Installation guidance is provided on the product page of the Kohler website, as highlighted above link. Packaging waste generated during installation is sent for recycling, and a transportation distance of 100 km is considered in accordance with cut-off criteria modeling.

CONSUMER USE

Conditions of Use

The use phase impacts of lavatories are primarily related to replacements and maintenance. If sold with a faucet, impacts from operational water use are also relevant.

Reference Service Life

Lavatory sink are assumed to remain in service for 20 years.

Cleaning and Maintenance

Lavatory sinks are assumed to require 260 cleanings per year with 10 ml of 1% sodium lauryl sulfate. These impacts are included within the product use stage of the LCA.

END OF LIFE

Recycle or Reuse

Collection and processing for vitreous product beneficial reuse and end-of-life are possible, but not widely available at present time

Disposal

Upon PCR default assumptions, The KOHLER® LCA model assumes 100% of the vitreous portion of the product, accessories and packaging materials are landfilled.

LIFE CYCLE ASSESSMENT

Description of Declared or Functional Unit

The functional unit represented here refers to a single Lavatory Sink.

Name	Value	Unit
Functional Unit	Single Lavatory sink in an average commercial environment over the estimated service life of the building	
Mass	11.89	kg
Conversion factor to 1 kg	0.08	

Estimates and Assumptions

The LCI/ LCA assumptions are mentioned below:

- Product transport from Manufacturing Plant to final customer and from customer to disposal site are modeled based on PCR specifications
- Product and packaging disposal scenarios are adopted from the PCR specifications
- Building estimated service life (ESL) is assumed to be 75 years
- Biogenic carbon content is estimated for three types of packaging materials: plywood, corrugate box and kraft paper
- Carbon calcination emission factors are sourced from US-EPA technical support document
- Infrastructure and capital equipment's were considered only to the extent represented in Ecoinvent secondary datasets, as their impacts in certain cases were found to exceed the cut-off threshold.

Cut-off Criteria

Cutoff criteria: exclusions are allowed if <1% of mass, energy, and impacts, with total exclusions ≤5% per module; hazardous materials are never excluded regardless of quantity.

This LCA is in compliance with the cutoff criteria specified above, as no known processes were excluded from this assessment outside of the specific items listed within the System Boundary.

Allocation

Impacts are allocated to individual products using a unit process approach. Product mass is typically used as the basis for allocating impacts. In some cases, differences in production quality is also considered. For materials that cross the system boundary, the cut-off rule was applied.

Data Sources

Primary manufacturing data was collected directly from process experts for the five Kohler vitreous plants within North America and Thailand, for calendar year of 2021-2024. Secondary data primarily references the Ecoinvent 3.11 LCI and DATASMART databases. Both databases are widely distributed and are referenced within the LCA community. All ecoinvent datasets have been critically reviewed.

Data Quality

Wherever secondary data is used, the study adopts critically reviewed data for consistency, precision, and reproducibility to limit uncertainty. The data sources used are complete and representative of North America, and Thailand in terms of the geographic and technological coverage and are a recent vintage (i.e., less than ten years old). Any deviations from these initial data quality requirements for secondary data are documented in the critically reviewed LCA report. When a product is produced at more than one plant, impacts are weighted by unit production quantities at each plant.

Interpretation

The environmental impact of lavatory sinks is primarily influenced by their replacement during the estimated service life of a commercial building. This recurring replacement affects the overall life cycle impact.

Additionally, raw material extraction and the manufacturing processes contribute to various environmental impact categories. The manufacturing process mainly affects the environmental impacts due to energy consumption, particularly from natural gas and electricity. Therefore, improving energy efficiency, material substitution, supply chain localisation, and material reduction continues to be a key focus for ongoing projects.

Since most of our unit processes contribute more than 5% to the overall environmental impacts, we are providing the complete inventory table of secondary materials used in the LCA as an annexure to this file to ensure full transparency.

Note: 1. Proxy: We have used the closest material if the required material is not available in Simapro database, e.g., Clay, Feldspar
 2. Modelled based on secondary data: As Material is not available in Simapro database so we have modelled it based on generic material composition.
 3. Regional: We have used the most suitable region data if dataset is not available in Simapro e.g. GLO

Peppigon	Activated bentonite (RoW) activated bentonite production Cut-off, U	Ecoinvent v3.11		
OPTAPX C1000G	Carboxymethyl cellulose, powder (RoW) carboxymethyl cellulose production, powder Cut-off, U	Ecoinvent v3.11	Kindly refer Note 2	
	Sodium hydroxide, without water, in 50% solution state (RoW) market for sodium hydroxide, without water, in 50% solution state Cut-off, U	Ecoinvent v3.11		
OPTAPX COG	Carboxymethyl cellulose, powder (RoW) carboxymethyl cellulose production, powder Cut-off, U	Ecoinvent v3.11	Kindly refer Note 2	
	Sodium hydroxide, without water, in 50% solution state (RoW) market for sodium hydroxide, without water, in 50% solution state Cut-off, U	Ecoinvent v3.11		
Talium powder	Silica sand (RoW) silica sand production Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Amende	Aluminum oxide (GLO) market for aluminum oxide Cut-off, U	Ecoinvent v3.11		
STAIN DSPS 14039 GREEN BAG25KG	iron ore, crude ore, 46% Fe (GLO) market for iron ore, crude ore, 46% Fe Cut-off, U	Ecoinvent v3.11	Kindly refer Note 2	
	Rare earth concentrate, 70% REO, from bastnaesite, at beneficiation/CN U	Ecoinvent v3.11		
	Zirconium oxide (RoW) zirconium oxide production Cut-off, U	Ecoinvent v3.11		
	Silica sand (RoW) silica sand production Cut-off, U	Ecoinvent v3.11		
Coarse Material	Zinc oxide (RoW) zinc oxide production Cut-off, U	Ecoinvent v3.11		
Gypsum	Gypsum, mineral (RoW) gypsum quarry operation Cut-off, U	Ecoinvent v3.11		
Corrugated carton	Corrugated board box (RoW) corrugated board box production Cut-off, U	Ecoinvent v3.11		
Pallet - to distribution center	EUR-flat pallet (RoW) market for EUR-flat pallet Cut-off, U	Ecoinvent v3.11		
Hexacomb block	Corrugated board box (RoW) corrugated board box production Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Stretch wrap - to distribution center	Polyethylene, linear low density, granulate (RoW) polyethylene production, linear low density, granulate Cut-off, U	Ecoinvent v3.11		
Slit sheet - to distribution center	Polyethylene, high density, granulate (RoW) polyethylene production, high density, granulate Cut-off, U	Ecoinvent v3.11		
Cushion Foam	Polyurethane, flexible foam (RoW) market for polyurethane, flexible foam Cut-off, U	Ecoinvent v3.11		
Plastic Tape	Polystyrene, granulate (RoW) polystyrene production, granulate Cut-off, U	Ecoinvent v3.11		
Plastic bag	Polyethylene, high density, granulate (RoW) polyethylene production, high density, granulate Cut-off, U	Ecoinvent v3.11		
PVC Film	Polyvinyl chloride, suspension polymerised (RoW) market for polyvinyl chloride, suspension polymerised Cut-off, U	Ecoinvent v3.11		
Literature	Kraft paper (RoW) kraft paper production Cut-off, U	Ecoinvent v3.11		
Labels	Kraft paper (RoW) kraft paper production Cut-off, U	Ecoinvent v3.11		
Ref-refractory-estva	Refractory, high aluminum oxide, packed (RoW) refractory production, high aluminum oxide, packed Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Ref-refractory-iro	Refractory, fireclay, packed (RoW) refractory production, fireclay, packed Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Ref-refractory-8&S	Refractory, high aluminum oxide, packed (RoW) refractory production, high aluminum oxide, packed Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Ref-refractory-resco	Refractory, high aluminum oxide, packed (RoW) refractory production, high aluminum oxide, packed Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Sponge	Cellulose fibre (RoW) cellulose fibre production Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1	
Dobi pad	Cellulose fibre (RoW) cellulose fibre production Cut-off, U	Ecoinvent v3.11	Kindly refer Note 2	
	Polypropylene, granulate (RoW) polypropylene production, granulate Cut-off, U	Ecoinvent v3.11		
Pinwood for ware boards	Pinwood, for indoor use (RoW) pinwood production, for indoor use Cut-off, U	Ecoinvent v3.11		
Metals, Steel	Steel, chromium steel 18/8 (GLO) market for steel, chromium steel 18/8 Cut-off, U	Ecoinvent v3.11		
Bulk bags	Polypropylene, granulate (RoW) polypropylene production, granulate Cut-off, U	Ecoinvent v3.11		
Plastic shrink wrap	Polyethylene, low density, granulate (RoW) polyethylene production, low density, granulate Cut-off, U	Ecoinvent v3.11		
Aluminum	Aluminum, wrought alloy (GLO) aluminum ingot, primary, to aluminum, wrought alloy market Cut-off, U	Ecoinvent v3.11		
Brass	Brass (RoW) brass production Cut-off, U	Ecoinvent v3.11		
EPS	Polystyrene, expandable (RoW) polystyrene production, expandable Cut-off, U	Ecoinvent v3.11		
Steel hardware	Steel, chromium steel 18/8 (GLO) market for steel, chromium steel 18/8 Cut-off, U	Ecoinvent v3.11		
Synthetic rubber	Synthetic rubber (RoW) synthetic rubber production Cut-off, U	Ecoinvent v3.11		
Bronze	Bronze (RoW) bronze production Cut-off, U	Ecoinvent v3.11		
Polyethylene	Polyethylene, high density, granulate (RoW) polyethylene production, high density, granulate Cut-off, U	Ecoinvent v3.11		
Polypropylene	Polypropylene, granulate (RoW) polypropylene production, granulate Cut-off, U	Ecoinvent v3.11		
Water, deionised (RoW)	Water, deionised (RoW) market for water, deionised Cut-off, U	Ecoinvent v3.11		
Sodium lauryl sulfate	Alkyl sulfate (C12-14) (GLO) market for alkyl sulfate (C12-14) Cut-off, U	Ecoinvent v3.11	Kindly refer Note 1

Sodium lauryl sulfate	Alkyl sulfate (C12-14) (GLD) market for alkyl sulfate, (C12-14) Cut-off, U	Ecoinvent V3.11	Kindly refer Note 1	

Note 1. Proxy: We have used the closest material if the required material is not available in Simapro database, e.g., Clay, Feldspar
 2. Modelled based on secondary data: As Material is not available in Simapro database so we have modelled it based on generic material composition.
 3. Regional: We have used the most suitable region data if dataset is not available in Simapro e.g., GLD

Material	Processes	Library
Oil Filter	Calendering, rigid sheets (RoW) calendering, rigid sheets Cut-off, U	Ecoinvent V3.11
Plastic	Extrusion, plastic film (RoW) extrusion, plastic film Cut-off, U	Ecoinvent V3.11
Pvc Pipe	Extrusion, plastic pipes (RoW) extrusion, plastic pipes Cut-off, U	Ecoinvent V3.11
Plastic	Blow moulding (RoW) blow moulding Cut-off, U	Ecoinvent V3.11
Bronze	Casting, bronze (RoW) casting, bronze Cut-off, U	Ecoinvent V3.11
Brass	Casting, brass (RoW) casting, brass Cut-off, U	Ecoinvent V3.11
Steel/SS	Impact extrusion of steel, warm, deformation stroke (RoW) impact extrusion of steel, warm, deformation stroke Cut-off, U	Ecoinvent V3.11
Nylon nut	Injection moulding (RoW) injection moulding Cut-off, U	Ecoinvent V3.11

Transportation Mode	Dataset	Library
Road	Transport, freight, lorry, 16-22 metric ton, diesel, EURO 4 (RoW) transport, freight, lorry, 16-22 metric ton, diesel	Ecoinvent v3.11
Train	Transport, freight, train, fleet average (RoW) transport, freight, train Cut-off, U	Ecoinvent v3.11
Transoceanic	Transport, freight, sea, container ship, heavy fuel oil (GLD) market for transport, freight, sea, container ship, heavy fuel oil	Ecoinvent v3.11

Electricity, Fuel and Water

Electricity and Fuel	Dataset	Library
Electricity Mx	Electricity, medium voltage (MX) market for electricity, medium voltage Cut-off, U	Ecoinvent v3.11
Natural Gas	nat, district or industrial, natural gas (RoW) heat production, natural gas, at industrial furnace >100kW Cut-off, U	Ecoinvent v3.11
Water	Tap water (RoW) market for tap water Cut-off, U	Ecoinvent v3.11

Wastewater Treatment and Disposal

Disposal	Dataset	Library
WWTP	Wastewater from ceramic production (RoW) market for wastewater from ceramic production Cut-off, U	Ecoinvent v3.11
Disposal	inert waste, for final disposal (RoW) treatment of inert waste, inert material landfill Cut-off, U	Ecoinvent v3.11
