

墙排去水弯管

9362T 墙排去水弯管

****Color code must be specified when ordering**

墙排去水弯管

9362T 墙排去水弯管

9362T

安装步骤		INSTALLATION
如何安装排水器 仅对于7383T 把锁紧螺母(1)、塑料垫片(2)和橡胶垫圈(3)从排水本体上依次取下。把排水本体从脸盆上部孔插入。再依次将橡胶垫圈(小面朝上)、塑料垫片和锁紧螺母从脸盆下方装回排水本体。锁紧螺母。 注意：如果需要，可在排水器盘片(4)底面沿周围涂一圈密封油灰或其它密封剂，而不使用橡胶垫片(5)。 注意：在锁紧螺母拧紧后，不可调整排水本体的位置，否则会破坏油灰或密封剂密封。		 How To Install The Drain Only For 7383T Remove the locknut(1), plastic washer (2) and the rubber gasket(3) from the drain body. Insert the drain body into the lavatory. Install the rubber gasket (Tapered side up), plastic washer and locknut back to the drain body in turn. Tighten the locknut. NOTE: If needed, apply a ring of plumbers putty or other sealants around the underside of the drain flange(4), instead of using rubber washer(5). NOTE: Do not reposition the drain after the locknut is tightened, or you may break the putty or sealant seal.
如何安装去水弯管 对于9362T，将接头(6)取下，然后装到排水器(7, 客户自备)上。注意不要弄丢橡胶垫片(8)。 测量排水器(9)的中心到预置排水口(10)间的距离。 将去水弯管(11)上的连接螺帽(12)和垫圈(13)取下。根据需要在确保横管(14)伸入去水弯管出水口和预置排水口的长度均不小于25mm的基础上，可适当切除横管，但避免损坏电镀表面。依次将连接螺帽和垫圈套入横管一端，然后将横管插入去水弯管出水口。锁紧连接螺帽以固定横管。 注意：确保横管(14)插入去水弯管出水口和预置排水口长度均不少于25mm。 将连接螺帽(15)和塑料垫片(16)取下。根据需要，在确保弯管(17)伸入弯管(18)的长度不小于25mm的基础上，可适当切除弯管(17)，但要避免损坏电镀表面。依次将连接螺帽和垫圈套入弯管(17)，然后将弯管(17)插入弯管(18)，锁紧连接螺帽。 注意：确保弯管(17)插入弯管(18)的长度不少于25mm。 将去水弯管(11)上的连接螺帽(19)和塑料管(20)依次取下，接着依次将连接螺帽和塑料管套入弯管(18)，将弯管(18)插入去水弯管(11)进水口。将装饰盖(21)套入横管(14)，将横管插入预置排水口。将橡胶垫片(8)装入连接螺母(22)，然后将连接螺帽(22)与排水器相连，但不锁紧。		 How To Install The Trap For 9362T, Remove the connector(6), then install it onto the drain(7, not provided). Note: do not lose the rubber washer(8). Measure the distance from the center of drain(9) to drain stub-out(10). Remove the nut(12) and the gasket(13) from the bottle trap(11). Ensure the pipe(14) insert into the drain stub-out and the bottle trap outlet at least 25mm. Cut it off as needed. Be careful, not to damage the finish. Slide the nut and the gasket onto one end of pipe, then insert the pipe into the bottle trap outlet. Tighten the nut to secure the pipe. NOTE: Ensure the pipe(14) must be inserted at least 25mm inside both the outlet of bottle trap and drain stub-out. Remove the nut(15) and the rubber washer(16). Ensure the trap(17) insert into the trap(18) at least 25mm. Cut it(17) off as needed. Be careful, not to damage the finish. Slide the nut and the gasket onto the trap(17), then insert the trap(17) into the trap(18). Tighten the nut. NOTE: Ensure the trap(17) must be inserted into the trap(18) at least 25mm. Remove the nut(19) and the plastic pipe(20) from the bottle trap(11). Slide the nut and the plastic pipe onto the trap(18), then insert the trap(18) into the bottle trap(11) inlet. Slide the escutcheon(21) onto the pipe(14), insert the pipe into the drain stub-out. Install the rubber washer(8) into the nut(22), then connect the nut(22) to drain, but do not tighten.

如果连接螺帽不能与排水器螺纹相连，则需要旋松连接螺帽(15)，调节弯管(17)伸入弯管(18)的长度。依次锁紧连接螺帽(15, 19, 22)以固定去水弯管。 注意：确保弯管(18)插入去水弯管(11)进水口的长度不少于25mm。 注意：对于7383T, 如果预置排水口与去水弯管(11)之间的距离大于90mm，则不安装装饰盖，直接将横管(14)插入预置排水口。 用油灰或合适的密封胶填充横管(14)同预置排水口(10)内径的间隙，去除多余油灰或密封胶。将装饰盖(21)后推与墙面接触。		If can't do so, loosen the nut(14), adjust the length that the trap(17) insert into the trap(18). Tighten the nuts(15, 19, 22) in order to secure the traps. NOTE: Ensure the trap(18) must be inserted into the bottle trap(11) inlet at least 25mm. NOTE: For 7383T, if the distance from the drain stub-out to the bottle trap(11) is longer than 90mm, and so do not install the escutcheon, then insert the pipe(14) into the drain stub-out directly. Fill up the gap between the drain stub-out(10) and the pipe(14) with plumber putty or sealants. Remove any excess putty or sealant. Push the escutcheon(21) against the finished wall.
安装结果检查 检查并确保所有的衔接螺母都已拧紧，确保把手在关的位置。 打开排水器和主要供水源，检查并修理有漏水的接口。 更换止水垫及活塞组件 仅对于7383T 逆时针旋下止水塞(23)，然后取出止水垫(24)。更换新的止水垫。逆时针旋下活塞组件(25)，更换新的活塞组件。装回止水垫及止水塞。 清理去水弯管杂质 逆时针转动弯管(26)直至取下，将垫片(27)放到一边。逆时针转动连接螺帽(19, 22), 取下橡胶垫片(8)和塑料管(20)放到一边。注意不要弄丢连接螺帽(19), 橡胶垫片(8)，垫片(27)和塑料管(20)。清理积在弯管(26, 28)和去水弯管本体(29)内的杂质，重新装回垫圈，垫片，塑料管，连接螺帽及弯管。		INSTALLATION CHECKOUT Ensure that all coupling nuts are tight. Ensure that the handle is in the off position. Turn on the drain and main water supply, and check for leaks. Repair as needed. Replacing The Washer And Piston Kit Only For 7383T Turn counterclockwise to remove the stopper(23). Take out washer(24). Replace with a new one. Turn counterclockwise to remove the piston kit(25). Replace with a new one. Reinstall stopper and washer. Clean Debris In Trap Turn the trap(26) counterclockwise until fully removed from the bottle trap body. Set the washer(27) aside. Turn the nuts(19, 22) counter-clockwise, then remove the rubber washer(8) and the plastic pipe(20), and set them aside. Note: do not lose the nuts(19), the rubber washer(8), the washer(27) and the plastic pipe(20). Clean out any debris that has collected in the traps(26, 28) and the bottle trap body(29). Reinstall the gasket, the washer, the plastic pipe, the nuts and the traps.
清洗说明 适用于所有加工处理过的表面：以中性肥皂水清洗镀层表面，再以干净的软布彻底擦干整个表面，许多清洁剂，比如氨水、去污粉及洁厕灵等，会对电镀表面造成伤害，切忌使用。 有磨损性的清洁用具或清洁剂也不可使用于科勒牌的水龙头及其配件上。		CLEANING INSTRUCTIONS All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. which could adversely affect the finish and are not recommended for cleaning. Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
