

Silea

Silea is a sparkling white stone, its face a constellation of translucent sugar-like veins in swaths of wispy grey. The crystalline composition also presents a tile rich in visual depth with natural reflective qualities and soft shifting of color as light carries across the surface.

INSTALLATION AND MAINTENANCE

- Install per industry standards for natural stone
- Always inspect material prior to installation — installed material cannot be accepted for return or credit
- Always lay out material prior to installation to properly blend and balance color
- As some white marbles have been known to yellow when they come in contact with epoxy, we advise against installing this marble with epoxy grout and/or adhesives or cleaning with epoxy removing cleaners, in order to eliminate the potential for yellow discoloration
- It is recommended to install with a white thinset
- It is recommended to seal natural stone with a penetrating sealer
- Due to the crystalline structure of this stone, we recommend using a glass blade (used for cutting glass tile) when cutting
- Periodic cleaning and resealing are recommended, using products formulated for natural stone
