MADE IN JAPAN

A building block that's anything but basic, our Context ceramic line is offered in a variety of field and mosaic formats and rich palette of artisanal glazes. The versatile collection is suitable for both modern and classic interiors.

RECOMMENDED USE

- Suitable for indoor and outdoor wall and flooring applications
- Suitable for installation on shower floors and walls
- Suitable for high temperature areas such as behind ranges and fireplace surrounds
- Please see Ann Sacks slip-resistance and wet-flooring application statement to determine usage in a wet area
- Outdoor use subject to climate and method of installation – material not affected by freeze/thaw conditions
- Suitable for use in submerged areas such as pools or fountains with custom paper face mounting (except the Pillowed Mosaic which cannot be paper faced mounted)
- The Metallic Black color should not be used in a wet area
- Bold colors (especially Emerald and Jasper) exhibit moderate color variation, even within color lots of the same design/size, thus please remember to blend tiles from multiple boxes to ensure proper blending of glaze
- Elongated pieces may exhibit slight warpage which is most evident in offset installations
- Testing data available upon request

INSTALLATION AND MAINTENANCE

- Install per industry standards for ceramic tile
- Always inspect material prior to installation – installed material cannot be accepted for return or credit
- It is recommended to seal matte finish with a penetrating sealer before and after grouting
- For daily cleaning use a soft sponge with diluted liquid dish soap, rinse with clean water. The metallic black finish may show fingerprinting or oil related markings over time, the periodic use of Miracle Sealants Porcelain and Ceramic Tile Cleaner can be used to remove these markings, following manufacturers' directions carefully
- Metallic glazes will fingerprint. Clean with a PH neutral cleaner - acidic or abrasive cleaners may damage the material
