INSTALLATION

How To Install The Faucet

Install the escutcheon(1) onto the faucet body base(2). Slide the adhesive washer(3) onto the underside of the escutcheon(1). Insert the inlet hose(4) of the faucet body into the basin hole.

From the underside of basin, fit the fixture washer(5) and the fixture nut(6) onto the inlet hose(4) of the faucet body. Position the faucet so that spout points to the front. Tighten fixture nut(6) to secure faucet to basin.

INSTALLATION CHECKOUT

Ensure that all connections are tightened and the handle is in the off position.

Turn on the main water supply and check for leaks. Repair as required.

Remove the aerator assembly(7) . Turn the faucet handle on. Run the water through the spout for about one minute to remove any debris. Remove debris from the aerator. Shut off the faucet and reinstall the aerator assembly.

CLEANING INSTRUCTIONS

All Finishes: Clean the finish with mild soap and warm water. Wipe entire surface completely dry with a clean soft cloth. Many cleaners may contain chemicals, such as ammonia, chlorine, toilet cleaner etc. Which could adversely affect the finish and are not recommended for cleaning.

Do not use abrasive cleaners or solvents on Kohler faucets and fittings.
