

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Controller

• Decision-Maker[®] MPAC 1500

Ratings

| Model | Current | Voltage, Frequency |
|-------|---------------|-------------------------|
| KBS | | |
| KBP | 150-4000 amps | 208-600 VAC 50/60 Hz |
| KBC | | 30/00 112 |

Transfer Switch Standard Features

- UL 1008 listed file # E108981
- CSA certification available
- IBC and HCAI seismic certification available
- Bypass/isolation switches for uninterrupted power to the load during switch maintenance and testing
- Available in 2, 3, or 4 pole configurations
- Integral solid neutral provides line-to-neutral monitoring
- Electrically operated, mechanically held mechanism
- High withstand and close-on ratings
- Fully rated for use as a manual 3-position transfer switch
- Heavy duty mechanical interlocks
- · Bypass switch and contactor position indicators
- Drawout contactor for ease of maintenance
- Design suitable for emergency and standby applications on all classes of load, 100% tungsten rated through 400 amps
- Reliable, field-proven solenoid mechanism
- Switching mechanisms lubricated for life
- Main shaft auxiliary contacts
- Front-connected style available for some amperages
- Standard one-year limited warranty. Extended limited warranties are available.

Standard Transition Models (KBS)

- Standard-transition transfer time less than 100 milliseconds (6 cycles @ 60 Hz)
- Double-throw, mechanically interlocked design (break before make)
- Solid, switched, or overlapping neutral

Programmed Transition Models (KBP)

- Programmed-transition operation provides a center OFF position that allows residual voltages in the load circuits to decay
- Programmable OFF time
- Double-throw, mechanically interlocked design (break both sides)
- Solid or switched neutral

Closed Transition Models (KBC)

- Closed-transition transfer switches operate with no power interruption during transfer and retransfer when both sources are within specified parameters (make before break)
- Quick-make, quick-break bypass switch operation for load transfer between live sources
- Source parallel times are less than 100 milliseconds (6 cycles @ 60 Hz)
- Adjustable extended transfer time relay (ensure that the setting complies with applicable codes)
- Solid or switched neutral

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Automatic Transfer Switch Controller

The Decision-Maker[®] MPAC 1500 Automatic Transfer Switch Controller is used on bypass/isolation transfer switch models.

Decision-Maker® MPAC 1500 Controller

- LCD display, 4 lines x 20 characters, backlit
- Complete programming and viewing capability at the door using the keypad and LCD display
- LED indicators: Source available, transfer switch position, service required (fault), and "not in auto"
- Programmable voltage and frequency pickup and dropout settings
- Programmable time delays
- Programmable generator exerciser
- Time-based load control
- Current-based load control (current sensing kit required)
- Two programmable inputs and two programmable outputs
- Up to four I/O extension modules available
- Modbus communication is standard
- RS-485 communication standard
- Ethernet communication standard
- Three-source system
- Prime power

For more information about Decision-Maker[®] MPAC 1500 features and functions, see specification sheet G11-128.

Codes and Standards

The ATS meets or exceeds the requirements of the following specifications:

- CSA C22.2 No. 178 certification available, file # LR58301
- EN61000-4-4 Fast Transient Immunity Severity Level 4
- EN61000-4-5 Surge Immunity Class 4
 (voltage sensing and programmable inputs only)
- IEC Specifications for EMI/EMC Immunity:
 - CISPR 11, Radiated Emissions
 - o IEC 1000-4-2, Electrostatic Discharge
 - o IEC 1000-4-3, Radiated Electromagnetic Fields
 - o IEC 1000-4-4, Electrical Fast Transients (Bursts)
 - o IEC 1000-4-5, Surge Voltage
 - o IEC 1000-4-6, Conducted RF Disturbances
 - o IEC 1000-4-8, Magnetic Fields
 - o IEC 1000-4-11, Voltage Dips and Interruptions
- IEEE Standard 446, IEEE Recommended Practice for Emergency and Standby Power Systems for Commercial and Industrial Applications
- IEEE 472 (ANSI C37.90A) Ring Wave Test
- NEMA Standard ICS 10-2005, Electromechanical AC Transfer Switch Equipment
- NFPA 70, National Electrical Code
- NFPA 99, Essential Electrical Systems for Health Care Facilities
- NFPA 110, Emergency and Standby Power Systems
- Seismic certification in accordance with the International Building Code is available. (Accessory kit is required for seismic certification.)
- IBC 2000, referencing ASCE 7-98 and ICC AC-156
- IBC 2003, referencing ASCE 7-02 and ICC AC-156
- IBC 2006, referencing ASCE 7-05 and ICC AC-156
- IBC 2009, referencing ASCE 7-05 and ICC AC-156
- IBC 2012, referencing ASCE 7-10 and ICC AC-156
- California HCAI pre-approval is available. (Accessory kit required.)
- Underwriters Laboratories UL 508, Standard for Industrial Control Equipment
- Underwriters Laboratories UL 1008, Standard for Automatic Transfer Switches for Use in Emergency Standby Systems, file # E108981

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Weights and Dimensions

Note: Weights and dimensions are provided for reference only. Always use the transfer switch dimension drawing for planning and installation. Weights and dimensions may vary for different configurations. See your local distributor for dimension drawings.

Weights and dimensions are shown for bypass/isolation transfer switches in NEMA type 1 enclosures. See the transfer switch dimension drawings for other enclosure types.

F: Front-connected

S: Standard rear-connected

* Approximate weights

† Optional pull boxes will increase the width. Pull box is required for bottom cable entry on 400-600 amp units. See Transfer Switch Accessories for available pull boxes (for NEMA type 1 enclosures only).

‡ Handles extend 159 mm (6.25 in.). Standard enclosures for 800 amp models are suitable for top and upper left side cable entrance only.

§ Recommended clearance to enclosure: 0.9 m (3 ft.) from rear, 1.2 m (4 ft.) from front [0.64 m (25 in.) required for transfer switch drawout].

Recommended clearance to enclosure: 0.9 m (3 ft.) from rear, 1.5 m (5 ft.) from front [0.9 m (3 ft.) required for transfer switch drawout].
** Both bypass switch manual operation handle and transfer switch carriage manual crank handle can be removed. Also note that the transfer switch carriage manual crank handle can be left in place and folded down. Recommended front clearance is 32 in. minimum.

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Withstand and Close-On Ratings (WCR)

Standard, Programmed, and Closed-Transition Models

Maximum current in RMS symmetrical amperes when coordinated with customer-supplied fuses or circuit breakers. All values are available symmetrical RMS amperes and tested in accordance with the withstand and close-on requirements of UL 1008. Application requirements may permit higher withstand ratings for certain size switches. Contact the factory for assistance.

Note: For specific breaker ratings, refer to the next table.

| | ١ | Withstand Current Ratings in RMS Symmetrical Amperes | | | | | | | | Short Time Ratings (sec.)] | | | | | |
|--------------------|-----------------|--|---------------|---------------|-----------------|---------------------|-----------------|------|-------|-----------------------------|---------|------------|------|----|----|
| Switch | С | Current-Limiting Fuses | | | | Time-Based Rating * | | | 480 V | Max | - | 600 V Max. | | | |

* Based on 0.050 seconds (approximately 3 cycles). Applicable to breakers with instantaneous trip elements.

† Applicable to 2-pole, 3-pole, and conventional 4-pole switches only. Overlapping neutral switches have "any" breaker ratings of 35kA, 0.050 seconds at 480 V.

\$ Short time ratings are provided for applications involving breakers that utilize trip delay settings for system selective coordination.

FC = Front Connected

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Ratings with Specific Manufacturers' Circuit Breakers The following charts list power switching device withstand and close-on ratings (WCR) in RMS symmetrical amperes for circuit breakers from specific manufacturers. Ratings apply to both open-and programmed-transition models. Circuit breakers are supplied by the customer.

Controller Accessories

Accessory Modules

- Alarm Module
- External Battery Supply Module
- Input/Output Module
- High-Power Input/Output Module
- Controller Disconnect Switch
- Current Sensing Kit
- Padlockable User Interface Cover
- Supervised Transfer Control Switch

See the controller specification sheet for more information.

Transfer Switch Accessories

Accessories are available either factory-installed or as loose kits, unless otherwise noted.

CSA Certification

Digital Meter

- Measure and display voltage, current, frequency, and power
- 35 programmable alarms
- LCD display, 67 x 62.5 mm (2.65 x 2.5 in.)
- Pushbutton operation
- Password-protected programming menus
- Two digital inputs
- Two digital outputs
- Two Form A relay outputs
- Serial port for optional network connections
- Data logging
- Factory-installed

Engine Start Circuit Monitor

- See Specification Sheet G6-165.
- Export Packaging

□ Heater, Anti-Condensation

- Hygrostat-controlled 120 VAC strip heater (customer-supplied voltage source required)
- 100 or 250 watts (sized for enclosure)
- Protective 15 Amp circuit breaker

□ Literature Kits

- Production literature kit (included with transfer switch)
- Overhaul literature kit

□ Load Shed Kit

- Forced transfer from Emergency to OFF for programmedtransition or closed-transition models
- Customer-supplied signal (contact closure) is required for the forced transfer to OFF function
- Factory-installed only

□ Pull Box

Mechanically Operated Bypass/Isolation

 Available in a variety of sizes for 150-3000 amp units in NEMA type 1 enclosures

| Amps | Pull Box Width, mm (in.) |
|----------------------|---|
| 150-600 | 305 or 381 mm (12 or 15 in.) |
| 800F | 305 or 560 mm (12 or 22 in.) |
| 800-1200S,1000-1200F | 305, 460, or 560 mm (12, 18, or 22 in.) |
| 1600-2000 | 460 or 610 mm (18 or 24 in.) |
| 2600-3000 | 460 or 660 mm (18 or 26 in.) |

RSA III Remote Serial Annunciator

- Monitors the generator set
- · Monitors Normal and Emergency source status and connection
- Monitors ATS common alarm
- Allows remote testing of the ATS
- For more information, see specification sheet G6-139.

Surge Protection Device (SPD)

- SPD available for the normal source supply
- · Surge protection reduces transient voltages to harmless levels
- Protection modes: L-L/L-N/L-G/N-G
- Replaceable phase and neutral cartridges for service
- Frequency: 50-60 Hz
- Operating Temperature Range: -40 to 176°F (-40 to 80°C)
- Remote contacts for customer-supplied status indicators: Contacts: 1 NO, 1 NC Min Load: 12VDC/10 mA
 - Max. Load: 250 VAC/1 A Wire Size (max.): 16AWG
- Fuse protection: 30 amps/600 V
- UL 1449, 3rd Edition for Type 2 applications
- IEC 61-643-1, 2nd Edition T2/11
- See additional SPD specifications below

Extended Limited Warranties

- 2-year basic
- 5-year basic
- 5-year comprehensive
- 10-year major components

Seismic Certification

□ IBC Seismic Certification

- Certification depends on application and geographic location. Contact your distributor for details.
- Available for 150-4000 amp models with NEMA 1 or NEMA 3R enclosures

California OSHPD Pre-Approval

Available for 150-4000 amp models with NEMA 1 or NEMA 3R enclosures

Models - KBS/KBP/KBC

Automatic Transfer Switches

Automatic Transfer Switches Mechanically Operated Bypass/Isolation

Model Designation

Record the transfer switch model designation in the boxes. The transfer switch model designation defines characteristics and ratings as explained below.

Sample Model Designation: KBS-DMVA-1200S

Model

K: Kohler

Mechanism

B: Mechanically Operated Bypass/Isolation

Transition

- S: Standard
- P: Programmed
- C: Closed

Controller

A: Decision-Maker® MPAC1500, Automatic

Voltage/Frequency

| C: | 208 Volts/60 Hz | K: | 440 Volts/60 Hz |
|----|-----------------|----|-----------------|
| D: | 220 Volts/50 Hz | M: | 480 Volts/60 Hz |
| F: | 240 Volts/60 Hz | N: | 600 Volts/60 Hz |
| G: | 380 Volts/50 Hz | P: | 380 Volts/60 Hz |
| H: | 400 Volts/50 Hz | R: | 220 Volts/60 Hz |
| J: | 416 Volts/50 Hz | S: | 400 Volts/60 Hz |

Number of Poles/Wires

- N: 2 Poles/3 Wires, Solid Neutral
- T: 3 Poles/4 Wires, Solid Neutral
- V: 4 Poles/4 Wires, Switched Neutral
- W: 4 Poles/4 Wires, Overlapping Neutral

Enclosure

A: NEMA 1

Current, Amps * 2600 0150 0800 2600 0225 1000 3000 0260 1200 4000 0400 1600 0600 2000

C:

NEMA 3R

* Some selections are not available on all models.

Connections

- S: Standard
- F: Front (800-1200amp only)

Note: Some selections are not available on all models. Contact your authorized distributor for availability.

Availability is subject to change without notice. Discovery Energy, LLC reserves the right to change the design or specifications without notice and without any obligation or liability whatsoever. Contact your local authorized distributor for availability.
